

DID YOU KNOW?

Artificial light affects safety, human health, the environment, and wildlife.

The Wellesley Municipal Light Plant will be piloting lighting options for new neighborhood streetlights this fall.

This workshop will help you evaluate lighting options for your neighborhood and your home!

BRIGHT IDEAS:

A Workshop on Smart Outdoor Lighting

Tuesday, September 26

7 to 8:30 pm

Wellesley Free Library

Join the **Wellesley Natural Resources Commission** and lighting expert **Bob Parks** for a discussion on safe and environmentally friendly lighting. The Wellesley Municipal Light Plant will be replacing 3,000 neighborhood streetlights with cost-effective and energy efficient LED (light emitting diode) fixtures and will be running a pilot to gather public input this fall. At this workshop, you will learn how to:

- Evaluate different types of lighting
- Choose the correct lights for your own property
- Use lighting to improve safety
- Talk to your neighbors about lighting

Bob Parks is an authority on outdoor lighting design and director of

the Smart Outdoor Lighting Alliance (SOLA), which helps communities install safe and efficient outdoor lighting.
