

## **Passionate about DEI Issues?**

Terri Gulyas, DEI Representative

LWV Greater Green Bay actively discusses DEI (diversity, equity and inclusion) in two committees: Education and Healthcare/Environment.

The Education Committee has discussed DEI-related changes in support for public education, current antagonism toward public school leaders in relation to curriculum, and increased calls for banning books and limiting expressions of diversity. In the Healthcare and Environment committee, dialogue has focused on water fluoridation and negative impact on child health, access to care for low income and elderly consumers, and legislation that adversely impacts women and refugees. Both committees are active, and both welcome new members.

Terri Gulyas, the DEI liaison between LWVGGB and LWVWI, recently met with Kole Torres, the DEI representative for LWVWI, to discuss our League's work in relation to DEI. Kole has been meeting with other local Leagues, and she shared some thoughts and ideas that are percolating around the state, so watch for further information about upcoming opportunities.

Bring your DEI ideas to our annual *Lively Issues* meeting in February. If you're passionate and can't wait to get involved, please contact Terri Gulyas at [tsgulyas@gmail.com](mailto:tsgulyas@gmail.com) for more information.
