

Testimony

House Health and Human Services - Health Subcommittee  
February 1, 2024

[HB664](#)

---

Abortion; born alive infant, treatment and care, penalty.

The League of Women Voters strongly opposes this disingenuous bill, which makes up a problem that doesn't exist. Doctors are already obligated to provide appropriate medical care. They are also the ones best suited to deciding what care is appropriate—rather than a group of legislators who are completely unfamiliar with the medical case and available options. We urge you to reject this bill which does nothing but further endanger and indeed, disregard, the health of Virginia women.
